Jade
DENTAL LAB

Merrimac Dental Laboratory, next door to Jade Dental, is actively looking for new denture and partial business. They are very involved in our All on Four fabrication. For some of the newer accounts who are not aware, Jade and Merrimac share some of our operations together such as combination cases and delivery. Repair of metal frames are welded by myself with our plasma welder.

If you need labs slips and boxes for either lab you can contact Paul, Mona, or Wally for assistance.

Call 630-232-1050 or Paul's cell at 630-363-6176.

The Dental Laboratory Business for the smaller labs is very difficult in this economy. We appreciate all the support that has been given to our dental labs and Greatly Thank You!

Getting the Grey Out

The photo below shows a successful anterior case done with our Lithium product.

All on Four Titanium Frames create a more esthetic and cleansable frame. We can now manufacture an all Titanium tissue and with a wider tissue coverage. The software allows for better tissue adaptation even on more difficult tissue contours. The top two frames below are the new design for the One Piece Hybrid Acrylic Appliance.
